

Integrating Kidz Online (www.kidzonline.org) FREE videos and lessons into your day-to-day activities is a breeze! From an entertaining, introductory video to a serious step-by-step tutorial, you'll find the tools to empower your students and enrich your lessons.

How can I use Kidz Online?

Kidz Online professional development videos increase your knowledge of technology while learning at your own pace in a relaxing, entertaining environment. TEACH IT videos are designed in a short, manageable format and are accompanied by hands on learning tasks. Online technology training units include:

- Webpage Creation
- Utilizing the Internet
- 3D / 2D Animation
- Video Production
- Online Collaboration
- Digital Audio
- PowerPoint
- Security and Ethics
- Digital Imaging

Kidz Online videos and learning resources are great for supplementing your classroom curriculum. All learning resources integrate authentic technology skills and offer complementary lessons for grades 6 – 12, subjects include: English, science, social studies, geography, history, art, music, mathematics, business and vocational studies

What if I don't teach technology? To help meet your needs, our team of teachers have prepared many lessons for core academic subjects, for example using digital video to teach writing skills, Shakespeare, the art of writing resumes, scientific investigation or probability.
