Lesson Plans

"The Kidz Online 21st Century Workforce Curriculum really excited students and staff to try new things. Not only did students show up early and stay after class to continue working with the KOL units - they actually created projects for themselves to continue at home! Students who had never considered advanced training - were rethinking their decision after becoming aware of possibilities available to them in the world of technology."

*Walt Mallory, Senior Educational Researcher
Humanitas, Inc.*

"By enhancing LATTC online courses with the rich media technology tutorials developed by KOL -- we can better prepare our students with the 21st century job skills necessary to be successful in the workplace -- while allowing them to earn college credit."

Linda Delzeit-McIntyre, Distance Learning Coordinator, Los Angeles Trade Technical College

Helping Prepare Students for the 21st Century Workplace

Kidz Online (KOL) is making valuable rich media resources available to prepare young adults entering the workforce, or currently within the workforce, with the 21st Century Communication skills necessary to be successful in today's job market. These resources work specifically to develop a knowledgeable, competitive, skilled employee ready for the ever changing marketplace and close the technology gap encountered by many of today's workers.

Whether included in a formal training program or accessed by an individual the KOL rich media technology resources are a click away. The KOL tutorials have been designed to engage students through stimulating streaming video and broadband interconnectivity that allows for materials to be easily accessed, shared and reused. All content accessed through the Kidz Online e-Learning platform is **free**, making this a resource for all to benefit from!

Kidz Online Rich Media Resources

Engaging

Easy, fun, and readily available, Kidz Online 21st Century Workforce tutorials focus on the successful development of basic technology skills by engaging students and fueling their natural curiosity through recognizable situations. Kidz Online units open a world of possibilities to students as they experience first hand and learn about digital photography, audio and imaging, 2D and 3D animation, and web page development.

Accessible

With more and more homes coming online, and schools, libraries and other public places gaining access to high-speed Internet access, KOL rich media resources can be accessed – anytime, anywhere by anyone!

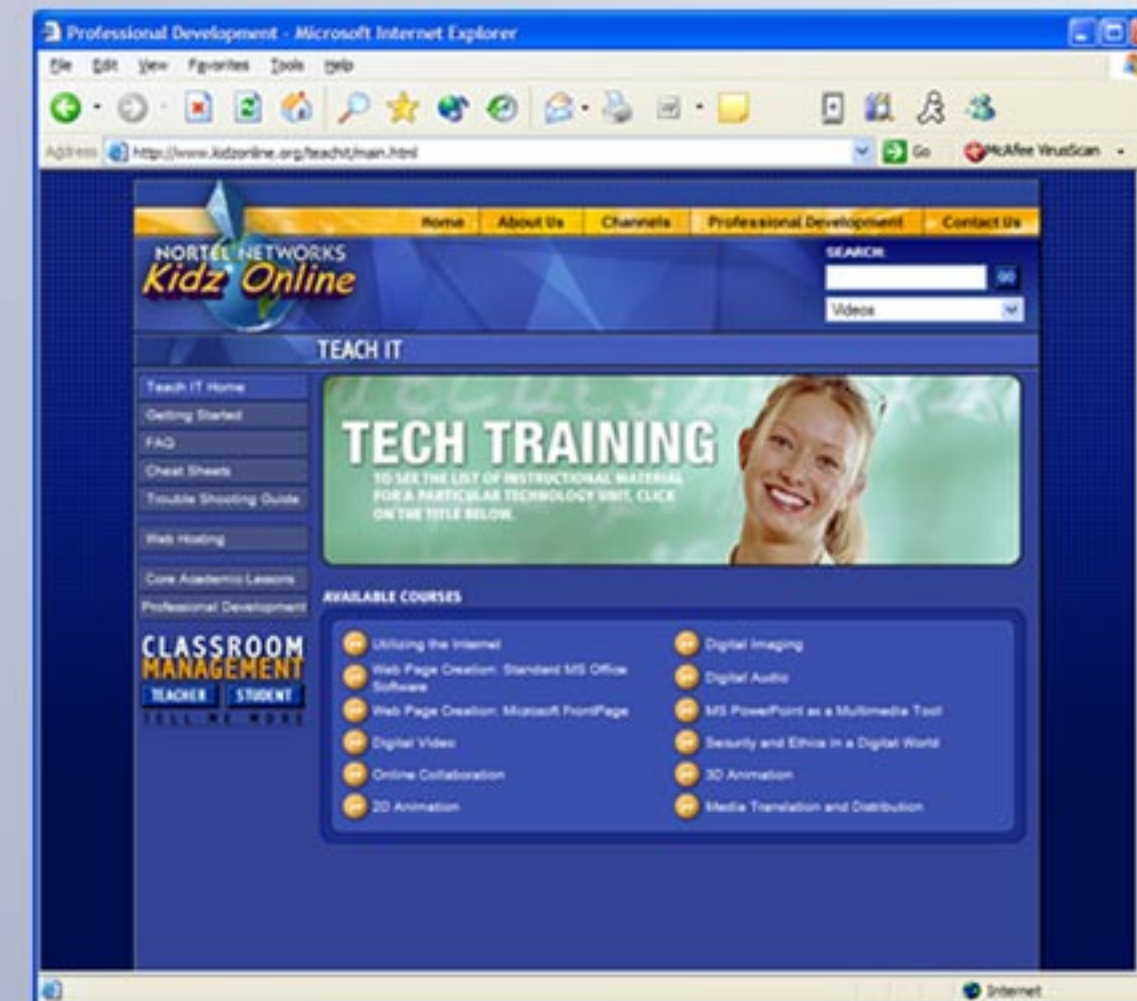

Flexible

Kidz Online videos can be used as stand-alone self-tutorials or integrated into an instructor's workforce training program. KOL rich media resources have been designed to offer both the beginner and the moderately experienced technology student access to easy-to-use, step-by-step tutorials.

Powerful

Distributed over advanced digital networks, Kidz Online offers rich media resources that utilize streaming video technology, including online help, question and answer evaluation, on-screen as well as printable step-by-step directions, and progression indicators.
